(Illustrator legacy format)
TO AVOID ANY DELAYS

Please also
attach preview of artwork in JPG (CMYK and 150dpi)
TO AVOID ANY DELAYS

What you need to know when submitting artwork (Please go to www.forestprint.com.au for more detail)

All embedded images must not be less than 300dpi.
All logo and images have to be embedded into the artwork.
Please make sure all text is correct as we will not alter your artwork and its content.
Please make sure that your artwork has at least 1mm bleed around all corners.
All important elements (text, images, logo etc.) have to be placed within the yellow line.

- We use standard CMYK for printing. Using other colour models in your artwork such as RGB and Pantone might cause differentiation or error in the colours on your print product.
- Final print product might only be 85% close to what you see your artwork as on screen in terms of colour. An interval of 15% of colour differentiation is an acceptable standard for the printing industry.
